ENVIRONMENTAL PROTECTION AGENCY

[FRL-5223-6]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before July 20, 1995.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260-2740, (please refer to ICR #1367.04).

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Gasoline Volatility Enforcement (EPA ICR #1367.04; OMB #2060-0178). This ICR requests renewal of the existing clearance.

Abstract: The Environmental Protection Agency's gasoline volatility regulations provide for a one pound per square inch allowance above the otherwise applicable standard for ethanol blends. This information collection request seeks approval for the requirement that facilities handling ethanol blends label invoices with the ethanol content; the required label identifies gasoline products that contain ethanol and thereby qualify for the allowance. Changes in the regulations since the previous ICR stated that it was probably overestimating costs. Now that the rule has been in effect for several years, there is only the simple clerical act (generally automatically computer generated) of stating on CBP records that the gasoline contains 10% ethanol. The previous ICR removed over half of the respondents since ethanol is rarely

blended to gasoline at the refinery level except for local use in areas where ethanol blends are common. The labelling requirement now provides purchasers of ethanol blends with the information necessary to manage their own compliance with the volatility regulations and to defend themselves from Agency actions on violations which they did not cause.

Burden Statement: The public reporting burden for this collection of information is estimated to average .3 hours per response, (assuming that half of the respondents will have no burden because of the use of automated equipment), including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and labelling the invoices.

Respondents: Entities that produce or handle ethanol blends.

Estimated Number of Respondents: 8,792

Estimated Total Annual Burden on Respondents: 1,319

Frequency of Collection: No reporting requirement. Inspections as needed.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing burden, to: Sandy Farmer, ICR Number 1367.04, U.S. Environmental Protection Agency, Regulatory Information Division (2136), 401 M Street SW., Washington, D.C. 20460 and

Office of Research and Development

Title: Opinion Survey of New York State Community Leaders and Residents Related to Environmental Quality In and Around Lake Ontario (EPA ICR No. 1754.01).

Abstract: The purpose of this survey to gather opinions from New York residents and leaders to identify motivations, intentions, behaviors, and barriers to stewardship of Lake Ontario. The Federal Water Pollution Control Act of 1972, as amended in 1987, sets forth the Great Lakes Water Quality Agreement, an agreement that requires the development of ecosystem objectives and action plans to improve water quality in the Great Lakes. In 1989, a binational (Canada/US) workgroup was established with the task of developing ecosystem objectives and indicators for Lake Ontario. The workgroup determined that a survey was needed to assess the motivations, behaviors and attitudes of residents along Lake Ontario, in order to develop meaningful plans to achieve the ecosystems objectives set forth by the 1987 Agreement. The survey has already been completed on the Canadian side of the Lake Ontario Basin.

This voluntary survey consists of a mail questionnaire distributed to a random sampling of New York State residents and a selected sample of their leaders along the Lake Ontario Basin. The questionnaire will request respondents to answer questions that assess: (1) Stewardship behavior, (2) motivations with regard to ecosystem protection, (3) commitment to environmentally responsible actions, and (4) barriers to behaviors that are supportive of ecosystem objectives.

The information will be used by government and private sectors to better understand the extent of environmental stewardship in the Great Lakes Basin, and to develop plans and strategies to better accomplish the objectives of environmental stewardship.

Burden Statement: Public reporting burden for this collection of information is estimated to average (0.5) hours per response including reviewing instructions, searching existing information sources, completing and

reviewing the collection of information, and submitting the information to EPA.

Respondents: Residents of New York State and New York State leaders living along the shores of Lake Ontario.

Estimated Number of Respondents: 500.

Frequency of Collection: One time.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 250 hours.
